Dr. Terence P. Meehan
Superintendent

Mr. Luca Passarelli
High School Principal

Dr. Tracy McCalla
Jr. High School Principal

March 18, 2019

Dear Parent/Guardian:

Neshannock School District students are required to participate in the Pennsylvania System of School Assessment. Curriculum regulations call for the annual administration of these assessments in Grades 3 through 8.

Neshannock students will complete the following PSSA exams:

Grade	Content Area	Testing Window
3, 4, 5, 6, 7, 8	English Language Arts	April 15 – 26, 2019
3, 4, 5, 6, 7, 8	Math	April 29 – May 3, 2019
4, 8	Science	April 29 – May 3, 2019
3, 4, 5, 6, 7, 8	Make Up Testing Window	April 29 – May 3, 2019

Neshannock School District encourages all eligible students to participate in the PSSA. Aggregate test data will assist district personnel in assessing the content of our curriculum, and the individual student data will enable parents and the school to better plan to meet the individual curricular needs of each student.

If parents do not want their child to participate in the PSSA due to a conflict with their religious beliefs, they may excuse their child from the assessment. However, **parents are required to review the actual PSSA materials prior to signing a religious exemption letter for their child.** The materials will be available for review in the high school and elementary offices by appointment only. Parents who choose to exempt their child from this assessment must notify the school principal in writing **no later than one week prior to the start date of each testing window.** Please telephone the high school office at 724-658-5513 or the elementary school office at 724-652-8709, if you wish to make an appointment to review the PSSA materials for your child's grade level.

Additional information for parents is provided with this letter. This information was prepared by the Pennsylvania Department of Education. If you have other questions, you may contact Dr. Tracy McCalla, Junior High School Principal, Mr. Matthew Heasley, Elementary Principal, Mrs. Alexis Anderson, Elementary School Assessment Coordinator or Mr. Adam Held, District Assessment Coordinator, at their respective phone numbers listed above in this letter.

Sincerely,

Mr. Adam Held
District Assessment Coordinator

Dear Parent/Guardian:

In an era of cell phones, smartphones and other electronic devices which can easily photograph and instantly share photographs, confidential and secure test materials can be easily compromised. Not only is it expensive to replace a compromised test item, the material contained in the PSSA and Keystone Exams is copyrighted property of the Commonwealth of Pennsylvania. Copying or duplicating the material from the assessment, including the taking of a photograph of secure assessment material, is a violation of the federal Copyright Act. Penalties for violations of the Copyright Act may include the cost of replacing the compromised test item(s) or fines of no less than \$750 up to \$30,000 for a single violation (17 U.S.C. § 101 et seq.).

In order to ensure reliable test results and to avoid the cost of replacing test items, the Department of Education requires schools to set rules and take certain steps to protect test materials. Electronic devices such as but not limited to cell phones, smartphones, smartwatches, E-readers, Nooks, Kindles, iPods, tablets, camera-ready devices, and any other electronic device which can be used to photograph or duplicate test materials, access the internet and/or communicate with others during the administration of the PSSA or Keystone Exams are not permitted in any testing site. Please speak with your child and let him or her know that the possession and/or use of a cell phone or other electronic device during the administration of the PSSA or Keystone Exams will result in consequences.

You will be contacted by the school if your child is discovered using and/or having a cell phone or other electronic device in his or her possession during the administration of the PSSA or Keystone Exams. Students who ignore this directive will be subject to the school's discipline policy and the Department of Education's requirement that the student's test will not be scored and the student will be required to retake the entire exam. The electronic device will be held by school staff, and the device's stored photographs and other functions will be examined with your permission. You may request to be present when the electronic device is examined. If a photograph of the PSSA or Keystone Exam is discovered or if permission to search other functions of the electronic device is refused, the device will be held by the school staff. The Pennsylvania Department of Education holds the copyright to all material contained within the PSSA and Keystone Exams, the Pennsylvania Department of Education will be contacted and further action may be taken.

If, after testing is complete and test materials have been returned, it is discovered that a student used and/or had a cell phone or other electronic device in his or her possession during the administration of the test, the school's discipline policy will be followed and the student's scores will be invalidated.

GENERAL INFORMATION ABOUT THE PSSA

Which schools participate?

All school districts and charter schools participate in the assessments. Nonpublic and private schools may also participate on a voluntary basis.

Which students take the assessments?

Except for a very few students who meet specific criteria for participation in an alternate assessment, all students are included in the assessments as outlined below:

ELA & Mathematics—Grades 3, 4, 5, 6, 7, and 8
Science—Grades 4 and 8

Who decided what the assessments should measure?

Groups of educators from all levels of education in Pennsylvania chose the areas of knowledge and skills upon which the assessments are based. The groups included teachers, supervisors, curriculum directors, and college specialists. They also reviewed, edited, and approved the test items.

Who administers the assessments?

Each school chooses the person(s) who will administer the assessments. In most cases, these are teachers in the students' building.

How are the results reported?

Two copies of the individual student report for all assessments will be sent to all schools and districts that participate for distribution to parents, teachers, school counselors, and/or principals. The state will not receive any report with individual names included.

School-level reports will be used for curricular and planning purposes. School districts and charter schools may publish the results of PSSA testing for each school. The state will also release school-by-school assessment data.

May parents see the assessments?

Yes, under one circumstance. School entities are required to have policies to ensure that parents or guardians have the right to review a state assessment in the school entity during convenient hours for parents or guardians from the time testing materials are received to the end of the make-up schedule in order to determine whether a state assessment conflicts with their religious belief. This is the only reason allowable under regulation.

Confidentiality agreements must be signed, and no copies of the assessments or notes about assessment items will be permitted to leave the school. If after reviewing the test, parents or guardians find the test to be in conflict with their religious belief and wish their student(s) to be excused from the test, the right of the parents or guardians will not be denied upon written request to the applicable school district Superintendent, charter school Chief Executive Officer, or AVTS Director. Parents or guardians should contact their child's school to make arrangements to review the test.

Report Testing Irregularities

Parents/guardians who believe that a testing irregularity may have occurred may email ra-ed-pssa-keystone@pa.gov or call 844-418-1651 to report the incident.

INFORMATION ABOUT THE ENGLISH LANGUAGE ARTS ASSESSMENT (grades 3 through 8)

How long does the assessment take?

The entire English Language Arts assessment takes approximately three to four hours to complete. Your school district will inform you about the assessment schedule.

What does the assessment include?

Each student completes three sections of questions for the English Language Arts assessment. Some portions will be the same for all students, and some will consist of different groups of questions.

What types of questions are on the assessment?

Students respond to multiple-choice, evidence-based selected-response, and constructed-response questions. In a multiple-choice question, the correct answer(s) is chosen from four options. Evidence-based selected-response questions have two parts, and students select one or more answers for each part. Constructed-response questions may include a short-answer (grade 3) or text dependent analysis (grades 4 through 8). Short-answer questions require students to compose a brief response to support their answer. For the text dependent analysis question, students analyze a text and use evidence from the reading passage to compose an essay.

How are written responses to constructed-response items scored?

The written responses for English Language Arts are scored by evaluators trained in applying an ELA-specific scoring guideline. For short-answer questions, scores are based on content only. Spelling and punctuation are not included as part of the scoring process. Responses to text dependent analysis questions are scored based on both content and writing skills.

What is assessed in English Language Arts?

The English Language Arts assessment addresses six major reporting categories as well as two text types. Students respond to standalone multiple-choice items assessing language. Additionally, students read a number of passages from literature and informational genres and respond to questions about these passages that indicate both comprehension and reading skills and the students' analysis and interpretation of different types of texts.

INFORMATION ABOUT THE MATHEMATICS ASSESSMENT (grades 3 through 8)

How long does the assessment take?

The entire mathematics assessment takes approximately two to three hours to complete. Your school district will inform you about the assessment schedule.

What does the assessment include?

Each student completes two sections of questions for the mathematics assessment. Some portions will be the same for all students, and some will consist of different groups of questions.

What types of questions are on the assessment?

Students respond to two types of questions: multiple-choice and open-ended. In a multiple-choice question, the correct answer is chosen from the four presented options, while open-ended questions require students to compose their responses. Open-ended questions generally require students to provide detail in support of their answers (such as showing or describing the steps performed to complete a calculation).

How are written responses to open-ended items scored?

The written responses for mathematics open-ended items are scored by evaluators trained in applying a mathematics-specific scoring guideline. In mathematics, scores are based on content only. Spelling and punctuation are not included as part of the scoring process.

What is assessed in Mathematics?

The mathematics assessment addresses five major reporting categories across four clusters. The reporting categories assessed and the proportion of questions in each reporting category vary by grade level. As a part of the assessment of Cluster A, Numbers and Operations, students in grades 4 through 8 respond to a set of questions without a calculator. Constructed-response items may require the students to show all of their work (e.g., calculations, graphs, drawings) and/or to explain in writing how they solved the problems.

INFORMATION ABOUT THE SCIENCE ASSESSMENT (grades 4 and 8)

How long does the assessment take?

The entire science assessment takes approximately one to two hours to complete. Your school district will inform you about the assessment schedule.

What does the assessment include?

Students in grades 4 and 8 complete two sections of questions for the science assessment. Some portions will be the same for all students, and some will consist of different groups of questions.

What types of questions are on the assessment?

Students respond to two types of questions: multiple-choice and open-ended. In a multiple-choice question, the correct answer is chosen from the four presented options, while open-ended questions require students to compose their responses. At grade 8, the science assessment also includes science scenarios.

What is a science scenario?

A science scenario contains text, graphics, charts, and/or tables and uses these elements to describe the results of a class project, an experiment, or other similar research. Students use the information found in a science scenario to answer multiple-choice questions.

How are written responses to open-ended items scored?

The written responses for science open-ended items are scored by evaluators trained in applying a science-specific scoring guideline. In science, scores are based on content only. Spelling and punctuation are not included as part of the scoring process.

What is assessed in science?

The science assessment addresses the four major reporting categories: The Nature of Science, Biological Sciences, Physical Sciences, and Earth and Space Sciences. The proportion of items in each reporting category varies by grade level.
