

## **Ellwood Group Inc**

Currently we have 99 job openings at our various companies. Because each business unit does their own hiring and all applicants must apply online, the best way to apply directly to a position is to do so via our website: [www.ellwoodgroup.com/careers](http://www.ellwoodgroup.com/careers). Internships and co-ops are available, which are listed on our website as well. All applicants for these openings need to apply online too. Internships require having completed a minimum of 1-year at college in their major. They may apply for internships even if they aren't posted on our website by going to our website and completing the info under "Internships and Scholarships" and attaching their resumes. The resumes will be sent to me via email, and I'll forward them to our Business Unit HR people. If there are general questions, they may contact me.
