

Dual Enrollment Winter 2023 Course List

December 18th – January 12th

<u>Subject</u>	<u>Code</u>		<u>Course Title</u>
CRJ	1000	400	Introduction to Criminal Justice
PSY	1000	400	Introduction to Psychology
SOCI	1000	400	Introduction to Sociology
MUSI	1000	400	Introduction to Music
SPAN	1000	400	Elementary Spanish I
COMJ	1010	401	Public Speaking
MATH	1010	400	Quantitative Reasoning
CMSC	1040	400	Personal Productivity Software
BOIL	1101	400	Fundamentals of Biology

Dual Enrollment Course Descriptions – Winter 2023

December 18th – January 12th

CRJ 1000 400 - Introduction to Criminal Justice: The course covers the nature, scope and impact of crime in the United States; independent and interdependent operations and procedures of police, courts and corrections; and introductory theories of crime and delinquency. The course introduces the justice model in a systematic way whereby students delve into the numerous components of the justice system, including law enforcement, legal and judicial process, and correctional operations. Career opportunities will be fully covered throughout the course.

PSY 1000 400 – Introduction to Psychology: This course introduces the scientific study of behavior and mental processes. Topics covered in the course include the biological basis of behavior, research methods, learning, memory, human development, personality, social psychology, abnormal behavior, and the treatment of mental disorders.

SOCI 1000 400 - Introduction to Sociology: Explore how people interact in social contexts shaped by inequality, health, gender, climate, race, technology, and class. Discover knowledge produced by sociologists working in research, business, advocacy, human services, and education. If you really want to change the world, you must first understand it.

MUSI 1000 400 – Introduction to Music: The purpose of this course is to expose the student to the various historical, analytical and aesthetic elements of music, thereby providing an opportunity to broaden and enrich personal enjoyment. This exposure to music is made using visual aids, audio recordings, radio, television, films and concerts.

SPAN 1001 400 – Elementary Spanish I: This course is designed for the student without previous knowledge of Spanish who wishes to achieve a command of language fundamentals. Acquisition of speech skills in the classroom is reinforced in the language laboratory. Progressively greater emphasis is placed on reading and writing.

COMJ 1010 401 – Public Speaking: Introduces students to the knowledge and skills necessary for developing effective oral communication. Course topics include audience analysis and research, organization, language use, style, and delivery that facilitate effective communication with a variety of audiences. Students are responsible for delivery of multiple speeches.

MATH 1010 400 – Quantitative Reasoning: This course provides study in mathematical representations and problem solving. Students analyze and solve problems in areas such as set theory, mathematics of finance, probability, and statistics. Students will apply mathematics to build financial strategies as they make purchases and investments throughout their lives.

CMSC 1040 400 – Personal Productivity Software: This course familiarizes students with the use of PC productivity software (word processing, spread sheet management, file management, and presentation software) and its effects on society.

BOII 1101 400 – Fundamentals of Biology: Introduces the fundamental principles of biology including cellular chemistry and energy conversions, cell structure, cell replication, genetics, evolution and organismal diversity, population dynamics and ecology, and environmental issues.
